

Sucher

Full-text search across files, contacts and events – in one field

Sucher searches your device by file *name* AND file *content* – text (TXT/MD), Office (DOCX/XLSX/PPTX and legacy DOC/XLS/PPT), OpenOffice/LibreOffice (ODT/ODS/ODP), PDF, e-books (EPUB/FB2, MOBI/AZW3), comic metadata, even contents inside archives (ZIP/7z/TAR) and music tags – plus contacts, calendar events, SMS, calls and captured notifications, all in one search field. Split off from EdgeTab, because a pure search needn't be an always-on service: open, search, done.

Full-text hits with the matching snippet Advanced search: author/title/series/type

What's inside

- Full-text and name search for documents, books and comics – unknown formats via the name.
- Advanced search by author, title, book series, file type and date.
- Narrow results: “🔍 search only within these N hits” – refine step by step.
- ODF (ODT/ODS/ODP), archive contents (ZIP/7z/TAR) and music tags are searched too.
- **Contacts, calendar events, SMS, calls** too – plus **captured notifications** (per app): searchable even after you swipe them away, e.g. parcel tracking numbers or 2FA codes.
- Back up / restore the index & settings as a file.
