

Sucher

Full-text search across files, contacts and events – in one field

Sucher searches your device by file *name* AND file *content* – text (TXT/MD), Office (DOCX/XLSX/PPTX and legacy DOC/XLS/PPT), PDF, e-books (EPUB/FB2, MOBI/AZW3) and comic metadata – plus contacts and calendar events, all in one search field. Split off from EdgeTab, because a pure search needn't be an always-on service: open, search, done.

Full-text hits with the matching snippet

Advanced search: author/title/series/type

What's inside

- Full-text and name search for documents, books and comics – unknown formats via the name.
- Advanced search by author, title, book series, file type and date.
- Narrow results: “🔍 search only within these N hits” – refine step by step.
- Search contacts and calendar events too.
- Back up / restore the index & settings as a file.
